Corporate Innovation

We help corporations design their innovation strategy to give the proper answers to their business challenges.

FinTech Strategy

Open banking strategies for financial institutions, growth hacking and business model building for fintechs. Bank-fintech collaboration.

Incubation Services

We provide incubation services for startups to help them scale their business effectively.

Business Process Development

We bring the best practices to set up or optimize the business processes from planning to implementation and operation.

Financial Services

We foster financial awareness, give resources & methods to follow up the real picture of the client's financial situation and opportunities.

FINANCIAL SERVICES

We provide **diverse and comprehensive financial advisory services**, offering that meets the needs of today's companies. Our clients benefit from our **practical advice**, and **innovative solutions** rooted in **deep experience** on the field of financials.

We've helped **launch** companies, **scale** companies, and sell companies to prepare for reach the next level by **establishing / restructuring the financial processes**, creating the accurate **financial plan** and monitoring method for investors or prepare the company for investor due diligence. During the work we use **lean analytics method** in order to meet clients expectations and offer the **most practical and efficient solution** we can find for the certain problem.

▲ Strategic financial planning

▲ Internal controlling system development

▲ Interim management

▲ Investment readiness assessment

'Invendor gave us the opportunity to see through the startup's current financial situation and made it easier to understand the future financial opportunities and challenges in the company we invested in.'

BUSINESS PROCESS DEVELOPMENT

The first step - Know your customer: **understand the strategy, identify the main business processes and the „bottlenecks“**. Based on our expertise afterwards **we create an action plan together** with our clients considering the available resources on the both sides. We trust the value added services which focus on the **real client needs** and give advantages in the short term as well as in the long term.

- ▲ Business process optimization
- ▲ Compliance management
- ▲ Funds & subsidies monitoring
- ▲ Project management

'Quality work, professional experience and friendliness is why we choose to work with Invendor team. After our project we had better understanding in our business processes and found out the main strengths and weaknesses in our system.'

-Shinrai
